YEAR
2016

MEDIUM
Responsive, site-specific installation

LOCATION
Vienna, Austria

DURATION
Sept 1 – 30, 2016

COLLABORATORS
Maja Ozvaldic, Miha Presker, Sasa Fabjan

CURATOR
Sasa Fabjan

SOURCE
dieangewandte.at ↗

KEYWORDS
architecture, interaction, kinetic, sensing, transdisciplinary

DESCRIPTION

interActive Window explores the shop window as an architectural threshold — the boundary between street and interior. The installation treats this boundary as a set of interdependent parameters, using sensing technology, urban flow, and kinetic effects to produce a space that responds to passers-by and connects heterogeneous everyday objects into a single dynamic system.

MARILYN RELOADED

The work shown here, *Marilyn Reloaded*, was presented within the interActive Window exhibition — a mannequin draped in a dark, bag-like garment suspended above a desk fan and wall text, set inside a street-level gallery vitrine in Vienna.

EXHIBITION HISTORY

interActive Window — Vienna, Austria. Opening September 1, 2016; on view September 2–30, 2016. Curated by Sasa Fabjan.
